

SIMPLE AND EFFECTIVE SECURITY SOLUTIONS

When it comes to running your business, you have a lot to worry about. You don't have time to implement new and complex solutions. And, with fraud and security threats constantly evolving, you need to be aware of safety measures to keep your business protected. Having payment protection solutions to help you secure, comply, and detect threats against your business is key.

Simple and effective solution

You're in control of your program

Reduced data breach risk

Protect your reputation

Security and compliance made easy

With SaferPayments Basic by Worldpay from FIS, PCI compliance validation can be made easy with an intelligent, self-service portal that helps you reduce risk and liabilities. Add to that breach assistance tools for added security, and you have a solution set that can provide real peace of mind.

Save time and effort while improving your data security

- Report your required annual **PCI compliance** via the online, intelligent, **self-service portal** with pre-populated information to streamline the process
 - Schedule any necessary scans via the portal and then login to review results
 - Telephone, email and chat support is available when you need help
- **Breach assistance** provides peace of mind with financial support in the event of a data breach
- Merchants that are using Worldpay's **point-to-point encryption** will benefit from PCI scope reduction and get a simpler SAQ within SaferPayments*

Reduce risk and liability for you and your customers by offering SaferPayments.

Contact us today to learn more.

*Requires point-to-point encryption enabled hardware/software

Keep your system secure

When you stay compliant, you are part of the solution: a united, global response to fighting payment card data compromise. Together, we can make a difference.
